

CCX: Custom Courses on edX

Peter Pinch and Peter Wilkins

OFFICE OF DIGITAL LEARNING
ENGINEERING DEPARTMENT

Why?

- 28% of MITx MOOC students self-identify as educators¹
- We get many requests from educators to use MITx:
 - in their own courses
 - with their own students

Why not SPOCs?

We have done this before, but SPOCs:

- are too hard to set up
- require too much training
- allow content modifications

What is a CCX?

Delegated educators ("coaches") can:

- adjust start dates & end dates
- select a subset of material from the MOOC
- invite & administer a *small* group of students
- view and download grades for their group of students

Status of CCX

- MVP version on edge
 - requires an advanced setting
- no discussions
- no analytics (yet)
- Available on edx.org in a few weeks
